Edge-bonded peel-plate shims

The edge-bonded standard panels of the peel-plate brand offer a high degree of convenience in the use of the panels. In contrast to laminated sheets, which are bonded to the surface, edge-bonded sheets allow for easy removal of the individual sheets.

This minimizes the risk of injury, saves time and allows the removed sheets to be recycled.

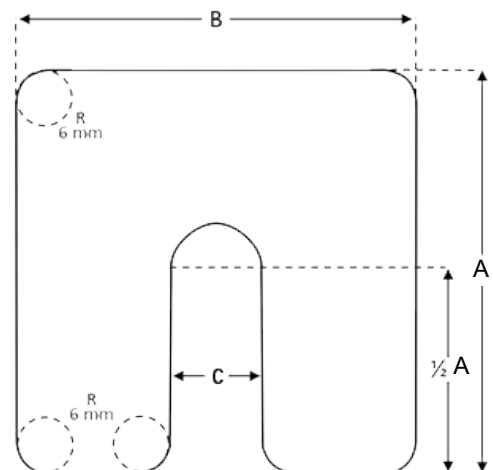

Edge-bonded peel-plates are available immediately from stock in various sizes and designs. The foil thicknesses of the edge-bonded standard peel-plates are 0.05 mm and 0.1 mm. The total thickness of a standard peel-plate package is 1 mm.

For visual distinguishability, parts of thickness 0.05 mm and 0.1 mm are colored differently. Peel-plate brand shims are rounded at all ends (radius = 6 mm).

Standard shims

Article no.	Thickness (mm)	AxB in mm	C in mm
PP/00043	8 x 0.1 + 4 x 0.05	43 x 43	12
PP/00048		48 x 48	14
PP/00053		53 x 53	14
PP/00068		68 x 68	16
PP/00083		83 x 83	20
PP/00098		98 x 98	25
PP/00118		118 x 118	30
PP/00043/1	10 x 0.1	43 x 43	12
PP/00048/1		48 x 48	14
PP/00053/1		53 x 53	14
PP/00068/1		68 x 68	16
PP/00083/1		83 x 83	20
PP/00098/1		98 x 98	25
PP/00118/1		118 x 118	30

Material	Stainless steel 1.4301 / 1.4310
